

Auto Water Turn-Off System

Stop Costly Water Damage Before it Happens

AWTOS protects your home with real-time leak monitoring

AWTOS is a smart home safety system that helps you prevent expensive water damage. It monitors water flow in real time, and automatically turns off your water if a leak is detected. You avoid the costs, stress and time spent on fixing damage, while unlocking better terms for your homeowners insurance.

We believe in the protection offered by AWTOS — that's why we provide the AWTOS Turn Off Valve to Orion180 policyholders **AT NO COST!** We'll also remove your policy's water damage sublimit after AWTOS is activated and proof of installation* is approved. Beginning on your next policy renewal, you'll save 10% on your home insurance premium, up to \$150.

Exclusive Benefits for Orion180 Policyholders:

- ✓ AWTOS Turn-Off Valve provided **AT NO COST** (Market Value \$499)
- ✓ AWTOS Sensors, an optional addon, are available as low as **\$20 each** when you order 5 or more.
- ✓ Water damage sublimit removed**
- ✓ Up to **10% premium discount** (capped at \$150)***
- ✓ AWTOS Monitoring Service through the app, **\$10/month subscription**

*AWTOS must be installed by a licensed plumber, and the policyholder is responsible for the cost of installation. Proof of installation must be submitted to receive key benefits.

**Coverage updates are applied after the AWTOS device is activated, and proof of installation is approved.

***The premium discount is applied upon the first home insurance policy renewal after AWTOS is purchased. Proof of installation is required.

What Is AWTOS?

AWTOS, the Automatic Water Turn-Off System, includes proprietary smart home safety devices and an intuitive monitoring app. This system protects your property from one of the most common and costly threats to homeowners: non-weather water damage.

Non-weather water damage accounts for nearly 1 in 4 home insurance claims and costs U.S. homeowners over **\$20 billion annually**. Even a slow, undetected leak—like one under a sink or behind a wall—can lead to extensive damage, mold, and claims averaging over \$11,000 per incident. AWTOS is built to mitigate those losses before they become disasters.

AWTOS Turn-Off Valve

Installed on your main water line, this device automatically stops water flow during a detected emergency.

Wireless Leak Sensors

These optional add-ons are designed for early leak detection. Place them in key areas around your home, like water heaters, washing machines, and below sinks.

The AWTOS App

This user-friendly app lets you monitor your home's water use from anywhere, at anytime.

Real-Time Leak Monitoring with the AWTOS App

Monitor water temperature, pressure, flow rate, total water consumption, and valve status.

- 1 When a leak is detected, the system automatically shuts off your water and the app sends you an alert.
- 2 Access to historical data.
- 3 Set additional alarms for high water usage, pressure changes, and temperature fluctuations.
- 4 Group sharing available.
- 5 Quick and simple setup via your home's Wi-Fi network.
